

WoRMS taxonomic checker: fact sheet

**YOU ARE
HERE!**

Aim	This service performs the taxonomic check against WoRMS of the taxa included in the OTU table and the approved “scientific name” and “aphiaID” will be returned.
Input	A <i>unified_species.csv</i> file which is an OTU table produced by the “PEMA runner” service. The columns correspond to the sequence/samples processed, whereas the first column is an ID column and the final one contains the species taxonomic information.
Requirements	None.
Analytical tools	A link to the WoRMS webservice.
Output	A <i>unified_species_worms.csv</i> file. The OTU table produced by the “PEMA runner” service will contain the correct scientific names and aphiaIDs.
