

ARMS output producer: fact sheet

Aim	This service produces final output files in a standardised format for subsequent statistical analyses and for human reading as well as machine2machine reading. Additional information from the <i>MasterARMS.csv</i> file will be also added in the final output files.
Input	The <i>unified_species_wrims.csv</i> file and the <i>MasterARMS.csv</i> file.
Requirements	This service will require harvesting information from the <i>MasterARMS.csv</i> file using sampleID information as a link.
Analytical tools	
Output	A standardised <i>Final_output.csv</i> file containing results of the analytical workflow as well as additional information that could be used to run downstream analysis using the “RvLab runner” service.
